# STRATEGIC PLAN

2026 – 2028

**INCLUSION • COLLABORATION • COMMUNITY**

# CLCN 2026–2028 National and Global Development Strategy

## 1. Strategic Positioning

CLCN operates within the structural gap between:

- Education
- Workforce entry
- Industry participation
- Community integration

CLCN develops life-ready and career-ready individuals through structured responsibility within a psychologically safe, values-aligned community environment.

Over the next 24 months, CLCN will consolidate its foundation in South Australia — our Home and Headquarters — and formally commence national and global development. Melbourne and Chongqing represent the first controlled rollouts within a broader national and global pathway.

*They are not endpoints. They are the first structured expansions of a centrally governed model.*

## 2. Strategic Intent (2026–2028)

Over the next 24 months, CLCN will:

1. Launch, operate and optimise the Global Talent Incubator (GTI) in South Australia at full structural capacity.
2. Commence national development through a controlled rollout in Melbourne (Victoria) as the first interstate expansion.
3. Commence global development through a controlled rollout in Chongqing as the first global expansion.
4. Strengthen employer ecosystem alignment through a minimum of five Strategic Talent Members per year.
5. Formalise measurable participant outcome metrics to strengthen institutional accountability and funding readiness.

National and global expansion will proceed progressively beyond these first rollouts once stability, governance integrity and outcome performance are demonstrated.

*Institutional integrity overrides growth velocity.*

### 3. Strategic Priorities

#### Priority 1 — Optimise the Global Talent Incubator (GTI) in South Australia

The Global Talent Incubator (GTI) is CLCN's structured capability development model, embedded within live operational environments and designed to bridge education, workforce entry and industry participation.

South Australia remains CLCN's Home and Headquarters and provides the structural stability required for national and global expansion.

Focus:

- Operate GTI at sustained and stable capacity.
- Preserve supervision-density integrity.
- Strengthen structured pathways between education, workforce entry and industry.
- Maintain the sequence of belonging → psychological safety → supported responsibility.
- Consolidate funding and employer engagement relationships.

South Australia anchors institutional maturity before broader rollout.

#### Priority 2 — Federal and State Government Funding

CLCN will continue to operate within a clear funding relationship model:

- Federal and State Government provide funding support.
- CLCN operates as a structured service provider.
- Reporting and accountability mechanisms are formalised.

Government funding alignment will continue to support:

- Workforce participation
- Industry readiness
- Social cohesion
- Long-term economic contribution

Engagement remains non-political and mission-aligned.

### **Priority 3 — Employer Ecosystem Strengthening**

CLCN will secure a minimum of five Strategic Talent Members per year. These members form the structural foundation for multi-jurisdiction employer engagement.

Purpose:

- Strengthen structured employer participation within the CLCN ecosystem.
- Enhance direct interaction between developed participants and industry.
- Provide ecosystem stability as national rollout progresses.

As national delivery capability matures, corporate membership structures will be progressively recalibrated to reflect expanded geographic scope and demonstrated value.

Employer ecosystem strengthening precedes membership recalibration.

### **Priority 4 — National Development Pathway**

CLCN will formally commence national development. Melbourne (Victoria) will serve as the first controlled rollout under central governance.

Purpose:

- Demonstrate cross-state replicability.
- Establish national operating credibility.
- Validate governance-led replication beyond South Australia.

Further interstate rollouts will proceed progressively based on performance, governance readiness and structural stability.

### **Priority 5 — Global Development Pathway**

CLCN will formally commence global development. Chongqing will serve as the first controlled rollout beyond Australia under central doctrine.

Purpose:

- Validate exportability of the CLCN operating model.
- Strengthen long-term global talent connection.
- Demonstrate governance-controlled scalability.

Additional global rollouts will proceed progressively once Chongqing demonstrates stable replication performance.

## 4. Strategic Outcomes (2028 Horizon)

By 2028, CLCN intends to demonstrate:

- Stable participant-to-employment outcomes.
- Reduced transition time from capability development to workforce entry.
- Sustained employment retention.
- Structured employer ecosystem participation across jurisdictions.
- Proven national replicability.
- Validated global replication capacity.

National and global development will remain performance-driven and governance-led.

## 5. Governance and Expansion Discipline

Expansion will proceed only where:

- Facilitator depth is sufficient.
- Participant outcomes remain stable or improve.
- Governance integrity is maintained.
- Financial sustainability is preserved.

These conditions reinforce institutional strength and long-term credibility.

*CLCN expands through disciplined rollout, not opportunistic growth.*
